

PZ-77 PLIERS

Multi-purpose Extraction Tool for Stubborn Fasteners... Slender Tips!

- Vertical serrations bite and grip a screw head without slippage.
- Tapered and Slender head ideal for work in a confined area.
- 182mm lengthy body requires less handgrip strength.
- 9.5mm side cutting blades for wire cut
- Coiled Spring loaded for easy handling
- Comes with a pliers mask for neat storage
- Handles & Cap in Pink color are also available (PZ-77P)

Features

The tips can grip even a very low-profile screw head securely.

Pliers' mask keeps the jaws closed when fitted, easier for carrying and storage in a tool box.

Side Cutter for Steel Wire (Max. 3.2mm) and Copper Wire (Max. 4.0mm)

Pliers used as a Carton Staple Remover

Applications

Stripped

Rusted

Torx

Dome Head

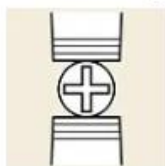

Screw Head Size

Dome (Truss) Head
Round or Pan Head
Screw head: dia. 3 to 9.5mm

How does PZ-77 work?

Ordinary Pliers

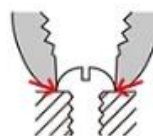

Ordinary pliers jaws are lined with horizontal serrations. When you grasp and turn a screw head with ordinary pliers, the jaws slip and the screw remains stuck.

The tips of jaws can not reach the outer edge of screw head when the jaws are opened.

PZ-77

Specially-designed teeth generate gripping power.

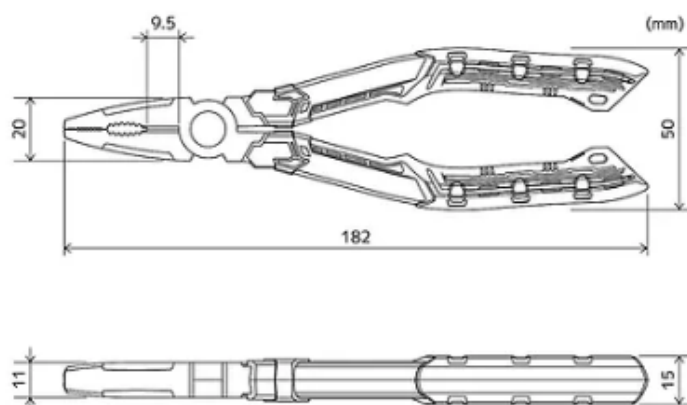

The serrated jaws angled inward grab the rim of screw head, so no slippage.

Note

- 1) The tool may not remove specially-hardened, heat-treated or glued screws.
- 2) Be sure to apply this tool to a screw head, but not to screw thread.
