

FEATURES

- Efficiency to 79%
- Wide temperature performance at full 1 Watt load, -40°C up to 105°C
- Single or dual outputs
- UL60950 recognised for functional insulation²
- Industry standard pinout
- Power sharing on dual outputs
- 3kVDC isolation (1 minute) 'Hi-Pot Test'
- 5V, 12V & 15V inputs
- 5V, 9V, 12V & 15V outputs
- Internal SMD construction
- No external components required
- MTTF up to 4.2 million hours
- No electrolytic or tantalum capacitors
- Pin compatible with MEV1, MEV3 & NMK series

PRODUCT OVERVIEW

The NMV series of industrial temperature range DC-DC converters are the standard building blocks for on-board distributed power systems. They are ideally suited for providing local supplies on control system boards with the added benefit of 3kVDC galvanic isolation to reduce switching noise. Available in SIP and DIP with dual and single output pinout. All of the rated power may be drawn from a single pin provided the total load does not exceed 1 watt.

1. Calculated using MIL-HDBK-217 FN2 and Telcordia SR-332 calculation model with nominal input voltage at full load.
 2. The NMV0505TSAC & NMV0512TSC are pending recognition to UL62368-1.

All specifications typical at T_A=25°C, nominal input voltage and rated output current unless otherwise specified.

INPUT CHARACTERISTICS					
Parameter	Conditions	Min.	Typ.	Max.	Units
Voltage range	Continuous operation, 5V input types	4.5	5	5.5	V
	Continuous operation, 12V input types	10.8	12	13.2	
	Continuous operation, 15V input types	13.5	15	16.5	
Reflected ripple current	NMV0505TSAC & NMV0512TSC		5		mA p-p
	All other output types		20	40	

GENERAL CHARACTERISTICS					
Parameter	Conditions	Min.	Typ.	Max.	Units
Switching frequency	NMV0505TSAC		55		kHz
	NMV0512TSC		60		
	5V input types		120	135	
	12V input types		150	170	
	15V input types		90	110	

OUTPUT CHARACTERISTICS						
Parameter	Conditions	Min.	Typ.	Max.	Units	
Rated Power	T _A = -40°C to 120°C, see derating graph			1	W	
Voltage Set Point Accuracy	See tolerance envelope					
Line regulation	High V _{IN} to low V _{IN}		All output types	1.0	1.2	%/%
			NMV0505TSAC & NMV0512TSC	1.1	1.2	

ISOLATION CHARACTERISTICS					
Parameter	Conditions	Min.	Typ.	Max.	Units
Isolation test voltage	Flash tested for 1 minute	3000			VDC
Resistance	Viso = 1000VDC	10			GΩ

TEMPERATURE CHARACTERISTICS					
Parameter	Conditions	Min.	Typ.	Max.	Units
Specification	NMV0505TSAC & NMV0512TSC	-40		105	°C
	All other output types	-40		85	
Storage		-50		125	
Case Temperature above ambient	NMV0505TSAC		16		
	NMV0512TSC		14		
	5V output types			28	
	All other output types			25	
Cooling	Free air convection				

ABSOLUTE MAXIMUM RATINGS	
Lead temperature 1.5mm from case for 10 seconds	260°C
Wave Solder	Wave Solder profile not to exceed the profile recommended in IEC 61760-1 Section 6.1.3. Please refer to application notes for further information.
Input voltage V _{IN} , NMV05 types	7V
Input voltage V _{IN} , NMV12 types	15V
Input voltage V _{IN} , NMV15 types	18V

CHARACTERISATION TEST METHODS

Ripple & Noise Characterisation Method

Ripple and noise measurements are performed with the following test configuration.

C1	1µF X7R multilayer ceramic capacitor, voltage rating to be a minimum of 3 times the output voltage of the DC-DC converter
C2	10µF tantalum capacitor, voltage rating to be a minimum of 1.5 times the output voltage of the DC-DC converter with an ESR of less than 100mΩ at 100 kHz
C3	100nF multilayer ceramic capacitor, general purpose
R1	450Ω resistor, carbon film, ±1% tolerance
R2	50Ω BNC termination
T1	3T of the coax cable through a ferrite toroid
RLOAD	Resistive load to the maximum power rating of the DC-DC converter. Connections should be made via twisted wires

Measured values are multiplied by 10 to obtain the specified values.

Differential Mode Noise Test Schematic

APPLICATION NOTES

Minimum load

The minimum load to meet datasheet specification is 10% of the full rated load across the specified input voltage range. Lower than 10% minimum loading will result in an increase in output voltage, which may rise to typically double the specified output voltage if the output load falls to less than 5%.

Capacitive loading and start up

Typical start up times for this series, with a typical input voltage rise time of 2.2µs and output capacitance of 10µF, are shown in the table below. The product series will start into a capacitance of 47µF with an increased start time, however, the maximum recommended output capacitance is 10µF.

	Start-up time	
	µs	
NMV0505TSAC	215	
NMV0505xC	1966	
NMV0509xC	5360	
NMV0512xC	11180	
NMV0515xC	16270	
NMV0512TSC	2300	
NMV1205xC	1290	

	Start-up time	
	µs	
NMV1209xC	4140	
NMV1212xC	8650	
NMV1215xC	11171	
NMV1505xC	803	
NMV1512xC	3510	
NMV1515xC	8361	

Typical Start-Up Wave Form

APPLICATION NOTES (Continued)

Output Ripple Reduction

By using the values of inductance and capacitance stated, the output ripple at the rated load is lowered to 5mV p-p max.

Component selection

Capacitor: It is required that the ESR (Equivalent Series Resistance) should be as low as possible, ceramic types are recommended. The voltage rating should be at least twice (except for 15V output), the rated output voltage of the DC-DC converter.

Inductor: The rated current of the inductor should not be less than that of the output of the DC-DC converter. At the rated current, the DC resistance of the inductor should be such that the voltage drop across the inductor is <2% of the rated voltage of the DC-DC converter. The SRF (Self Resonant Frequency) should be >20MHz.

	Inductor			Capacitor
	L, μ H	SMD	Through Hole	C, μ F
NMV0505TSAC	22	84223C	11R223C	22
NMV0505xC	22	82223C	11R223C	1
NMV0509xC	100	82104C	11R104C	0.47
NMV0512TSC	10	82103C	11R103C	22
NMV0512xC	150	82154C	11R154C	0.33

PACKAGE SPECIFICATIONS

MECHANICAL DIMENSIONS

DIP package

SIP package

* Pin not fitted on single output variants.
 All dimensions in mm (inches) Controlling dimension is mm.
 All pins on a 2.54 (0.100) pitch and within ±0.1 (0.004) of true position from pin 1 at seating plane 'S'
 For SIP products, from date code D2224 onwards, products have an embossed logo on the top of the case.
 Prior to this date, SIP products have a flat surface finish.

Weight: 2.4g (DIP) 2.1g (SIP)

DISCLAIMER

Unless otherwise stated in the datasheet, all products are designed for standard commercial and industrial applications and NOT for safety-critical and/or life-critical applications.

Particularly for safety-critical and/or life-critical applications, i.e. applications that may directly endanger or cause the loss of life, inflict bodily harm and/or loss or severe damage to equipment/property, and severely harm the environment, a prior explicit written approval from Murata is strictly required. Any use of Murata standard products for any safety-critical, life-critical or any related applications without any prior explicit written approval from Murata shall be deemed unauthorised use.

These applications include but are not limited to:

- Aircraft equipment
- Aerospace equipment
- Undersea equipment
- Power plant control equipment
- Medical equipment
- Transportation equipment (automobiles, trains, ships, etc.)
- Traffic signal equipment
- Disaster prevention / crime prevention equipment
- Data Processing equipment

Murata makes no express or implied warranty, representation, or guarantee of suitability, fitness for any particular use/purpose and/or compatibility with any application or device of the buyer, nor does Murata assume any liability whatsoever arising out of unauthorised use of any Murata product for the application of the buyer. The suitability, fitness for any particular use/purpose and/or compatibility of Murata product with any application or device of the buyer remain to be the responsibility and liability of the buyer.

Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards that anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm, and take appropriate remedial actions. Buyer will fully indemnify and hold Murata, its affiliated companies, and its representatives harmless against any damages arising out of unauthorised use of any Murata products in any safety-critical and/or life-critical applications.

Remark: Murata in this section refers to Murata Manufacturing Company and its affiliated companies worldwide including, but not limited to, Murata Power Solutions.

This product is subject to the following [operating requirements](#) and the [Life and Safety Critical Application Sales Policy](#):
