## Manufacturer Information

Manufacturer	: Korchip Corporation
Location	: KORCHIP B/D, 359, Manan-ro, Manan-gu, Anyang-si, Gyeonggi-do,
	KOREA
Tel.	: +82-31-361-8000
Fax.	: +82-31-361-8080

#### 1. Scope

This specification applies to Chipcell Carbon(Electric Double Layer Capacitor ; EDLC), submitted to specified customer in cover page.

#### 2. Part Number System

DCSR	<u>3R6</u>	<u>474</u>	T
1	2	3	4

- ① Series Name : DC(Double layer capacitor Coin type), S(Small size), R(Reflow type)
- ② Rated Voltage : 3.6VDC
- (3) Capacitance : 0.47 F (474 = 47  $\times$  10  $^{\rm +4}$  uF)
- ④ Special Suffix : high Temperature identification code (+85 $^{\circ}$ C)

#### 3. General Specifications

ITEMS	SPECIFICATIONS
Rated Voltage	3.6 VDC
Operating Temp.	-40 ~ +85 °C
Capacitance	0.47 F
Capacitance Tolerance	-20 ~ 80 %
Equivalent Series Resistance (ESR)	Less than $50 \Omega$

#### 4. Appearance and Dimensions

### 5. Reliability Specifications

Item	I		Specification	Test Condition	
	Capacitance Change	Step	Within ± 50% of Initial Value	Measure electrical characteristics af	
	ESR	2	8Times or less than Initial Value	temperatur	re atmosphere for one(1)
-	Capacitance Change	Sten	Within ± 30% of Initial Value	Step	Temperature
Characteristics	ESR	4	4Times or less than	1	20±2°C
	Capacitance		Within ± 10%	3	-40±2 ℃ 20±2 ℃
	Change	Step	of Initial Value	4	85±2℃
	ESR Change	5	Within ± 10% of Initial Value	5	20±2°C
Reflow	Capacita	nce	Spec. Value	Pb-Free Re	eflow Solder
Soldering Effect	Appearar	nce	No Marked Defect	Peak Temp. : $260\pm 5^{\circ}$ C Duration at Peak Temp. : $5\pm 0.5$ sec.	
	Capacita Change	nce	$\pm$ 30% of Initial Value	Temp. : 40±2℃	
Humidity Resistance	ESR	3Times or less than Spec. Value		Humidity : 90 ~ 95%RH Time : 240±8 Hours	
	Appearar	nce	No Marked Defect	No Voltage Applied	
Self Discharge Characteristics	Voltage		More than 2 5Vdc	Charging Condition	Voltage : 3.6Vdc Current : 50 <sup>mA</sup> Charge Time : 24 Hours
				Self Discharge Condition	Duration : 24 Hours Temp. : Less than 25℃ Humidity : Less than 70%RH
Terminal Strength			Terminals shall not be	Load 1kg , 10±1 Sec.	
Terminal Bend Strength	ninal Appearance trength		separated	Load 1kg , Angle 90° , 1Cycle	
	Capacitance Change		Within ± 30% of Initial Value	Temp. : 85±2℃ Test Time : 1,000Hours Applied Voltage : 3.6Vdc	
Endurance	ESR		4Times or less than Spec. Value		
	Appearance		No Marked Defect		
	Capacitance Change		Within ± 30% of Initial Value	Temp. : 85±2℃ Test Time : 1,000 Hours No Voltage Applied	
Shelf Life	ESR		4Times or less than Spec. Value		
	Appearance		No Marked Defect		

#### 6. Packing Specifications

#### 1) Carrier Tape

#### 2) Reel

#### 3) Box

#### 7. Labeling Standards

#### Lot No. System

- Ex.) <u>S</u> <u>I</u> <u>X</u> <u>A</u> <u>C</u> <u>002</u> (1) (2) (3) (4) (5) (6)
- ① Product Code :  $\underline{S}$  (Chipcell Carbon)
- 2 Production Year Code : A (2016), B (2017), C (2018), ..., H (2023), <u>I</u> (2024)...
- ③ Factory Identification Code : X (Factory X)
- ④ Production Month Code : <u>A</u> (Jan.), B (Feb.), ..., J (Oct.), K (Nov.), L (Dec.)
- ⑤ Production Date Code : 1 (1st), 2 (2nd), ..., 9 (9th), A (10th), B (11th), C (12th) ...
  Q (26th), R (27th), S (28th), ..., V (31th)
- 6 Lot Issuing Serial Code : 001 (First lot of a specific day), <u>002</u> (Second lot of a specific day), 003 (Third lot of a specific day)...

#### 8. Measuring Method Of Characteristics

KORCHIP CORP.

#### 9. Mounting

Excessive heat stress may result in the deterioration of the electrical characteristics of the Chipcell Carbon and electrolyte leakage due to the rise in internal pressure. Use the general reference chart then set soldering temperature and time.

The time of repeated reflow soldering must be two times or less.

% Do not use reflow soldering when the cell voltage is above 0.3V.

\* After SMT soldering, the sleeve may over-shrink or be deformed partially, however it makes no electrical or functional problem to the capacitor.

#### 10. Cautions for Use

Please be careful for following points when you use Chipcell Carbon.

1) Do not apply more than rated voltage.

If you apply more than rated voltage, Chipcell Carbon's electrolyte will be decomposed and its ESR increase. At the worst, it may be broken.

- 2) Do not use Chipcell Carbon for ripple absorption.
- 3) Polarity

Please mount it in accordance with its polarity.

4) Operating environment and lifetime

Chipcell Carbon shows faster deterioration in high temperature operation. The lifetime of Chipcell Carbon follows the general lifetime acceleration rule of double or half per every  $10^{\circ}$ C of ambient temperature decrease or increase respectively. A large temperature difference in one day or humid operating environment results in dew condensation on the surface of Chipcell Carbon and it may cause fast deterioration or electrolyte leakage of Chipcell Carbon.

If Chipcell Carbon is used in an electronic or electrical device over a long period of time especially in high temperature or high humidity environment, please check it periodically and replace it when necessary.

5) Cleaning

Some detergent or high temperature drying causes deterioration of Chipcell Carbon. If you wash Chipcell Carbon, Consult us.

6) Following figure shows the general back-up circuit.

- D : Diode to prevent the reverse current R : Resistor to control the charging
  - current

7) Short-circuit of Chipcell Carbon

DO NOT short-circuit between terminals of Chipcell Carbon without resistor.

8) Storage

In long term storage, please store Chipcell Carbon in following condition;

- ① TEMP. : 15 ~ 35 ℃
- (2) HUMIDITY : Less than 75%RH
- ③ Non-dust, non-acidic and/or non-alkaline atmosphere
- 4 Avoid direct sun light, strong magnetic field

Storage period limit is one(1) year when a Chipcell Carbon is stored in the above condition. Storage in improper condition may cause some damage to the Chipcell Carbon.

If the storage period exceed one(1) year in the customer's warehouse, please contact the manufacturer.

- 9) Do not disassemble Chipcell Carbon . It contains electrolyte.
- 10) Series connection of Chipcell Carbon

Over-rated voltage may be applied to a single Chipcell Carbon in series connection due to the deviation of capacitance and ESR of each Chipcell Carbon. Please inform us if you are using Chipcell Carbons in series connection and please design so as not to apply over-rated voltage to each Chipcell Carbon, and use Chipcell Carbons from same lot.

- 11) The tips of Chipcell Carbon terminals are very sharp. Please handle with care.
- 12) Industrial Application

Some industrial applications require a very high level of reliability to its parts including carbon-base 2nd. batteries i.e. Chipcell Carbons. Therefore if the Chipcell Carbon is to be used in an industrial application such as factory machinery, heavy electricity, etc. periodic inspection of Chipcell Carbon is necessary. If there found any problem with the Chipcell Carbon, please replace it.

13) Use of Functional Coating Chemicals

Some solvents of functional coating chemicals which applied on the same PCB with the Chipcell Carbon may cause undesired effects on it such as surface oxidation or electrolyte leakage. When apply those chemicals, be careful of not coating the Chipcell Carbon's surface.

#### 11. Environmental Management

All Chipcell Carbon products are RoHS 1, 2 and 3 compliant, Halogen Free and environment friendly.

	RoHS 1,2 directive	ELV directive		Halogen Flame	RoHS 3 directive	
Series	(Pb, Cr+6, Hg, Cd,	(Pb, Cr+6,	PVC	Retardant Free	(DEHP, BBP,	etc.
