| SPEC.NO. | C-4408-192(02) | SPECIFICATION | CATION CODE NO. C04408 | | | | | | |
| Cautions and Warnings : | | | | | | | | | |
| All of the components are manufactured, designed, and promoted for applying in general electronics devices, for the specific area such as automotive, medical, military and aerospace except for general electronic devices, Coilmaster must be asked for written approval before incorporating the components into these areas. | | | | | | | | | |
| 2. The components that w | vill be used in high-reliability / high le | evel of safety applications should be pre-evaluated by | the end customer. | | | | | | |
| Especially in customer a | applications in which the malfunctior | n or failure of an electronic component could endange | r human life or health. | | | | | | |
| The customer shall be r | esponsible for evaluating and confir | ming Coilmaster product is suitable for use in custom | er's applications. | | | | | | |
| 3. Customer must be cau | tioned to verify that data sheets are | the updated ones before placing orders. In the individ | dual cases, any trouble or t | failure of | | | | | |
| electronic components l | nappens during their long span canr | not be eliminated even follow the instruction with exist | ing technology. | | | | | | |
| 4. Washing / Cleaning pro | ocess may jeopardize the product a | nd cause the defect. Washing agents may harm the l | ong-term functionality of th | e product | | | | | |
| 5. The storage period sho | uld not be longer than 12 months (I | n the specific storage environment). The oxidization r | nay happen on the termina | ıls. | | | | | |
| Hence all the products | shall be used within 12 months afte | r the shipping date. If the time is over 12 months, plea | ase check the solderability | before use it. | | | | | |
| 6. Products should not be | kept in unsuitable storage condition | ns, such as areas susceptible to high humidity, high te | emperatures, dust or corro | sion. | | | | | |
| 7. Don't touch electrodes | directly with bare hands as oil secre | ations may inhibit soldering. Always ensure optimum o | conditions for soldering. | | | | | | |
| 8. Don't bend the terminal | s or subject them to excessive stre | SS. | | | | | | | |
| 9. Please ensure that all t | erminals and case lugs are complet | tely fixed with solder onto PCB | | | | | | | |
| 10. Ensure the tuning slug | g or cap is not fixed by solder flux du | uring the production process. | | | | | | | |
| 11. Avoid placing coils ne | ar the edge of the PCB | | | | | | | | |
| 12. Don't touch any expos | ed winding part and avoid coming i | nto contact with the guide of the electrode in automati | c mounting | | | | | | |
| 13. The inductor / coil / co | mmon mode choke generates heat | when current is applied. Please take care of this duri | ng the design. | | | | | | |
| 14. Always handle the pro | duct with care to prevent the damag | ge. | | | | | | | |
| 15. Our specification specifies the quality of the component as a single unit. Please ensure the component is thoroughly evaluated in your application circuit. | | | | | | | | | |
| Even for customized products, conclusive validation of the component in the circuit can only be carried out by customer. | | | | | | | | | |
| 16. The general testing co | 16. The general testing condition is in the room temperature 25 +/- 5°C and humidity under 65% RH, which is applied to all products. | | | | | | | | |
| 17. If have any query, please feel free to contact our sales department. | | | | | | | | | |
| | | | | | | | | | |
| | | | | | | | | | |
