

**Product Name:** L9110 Fan Motor Module 75mm DC 5V PWM Flux Workshop for Arduino

**Features:**

- Also designed for fire fighting robots
- Adopt L9110 as bridge drive datasheet.
- 5V supply voltage
- Propeller diameter 7cm

**Description:**

- Designed for fire fighting robot and adopt 9110 H as the bridge drive
- Can be used with steering engine to control the wind direction
- Can control positive and negative going motion easily.
- High quality propeller,high efficiency
- Can be easily blow out the lighter flame(beyond 20 cm)
- Working Voltage: 5V
- Color: Red + white + black
- Size:Approx.34 x 26 x 12mm/1.33\*1.02\*0.47inch(excluding propeller)
- Propeller Diameter:Approx.75mm/2.95inch

**Package Included**

1PCS X L9110 Fan Motor Module 75mm DC 5V PWM Flux Workshop for Arduino
