

HM-10 Bluetooth 4.0 Module

Description:

Support for Apple IOS5 / IOS6 system

2 power input port with anti-anti-circuits. Anti avoid accidental power plug module caused burning issue.

An internal logic level conversion circuit with. No external 5V level to turn into a 3.3V level

This module advantages:

Bluetooth 4.0 module. BT V4 module interfaces and microcontroller connection requires only four lines: 5V (VCC) GND TXD RXD
