

5V 6 Channel Relay Module with light coupling for PIC ARM DSP AVR Raspberry Pi

6 relay output modules, relay output contacts Maximum 250V 10A. Input IN1, IN2, IN3, IN4, IN5, IN6 active low signal line. VCC, GND power supply input power alone can relay relay supply input JD-VCC.

Module size: 10.30cm * 5.27cm

use:

- 1, supports all MCU control.
- 2, industrial areas;
- 3, PLC control;
- 4, smart home control;

Package Included:

- 1 x 6 Channel Relay Module
