

AMS1117 5V Power Supply Module

Description:

1 Input: 6 ~ 12V DC (input voltage must be higher than the output voltage to 1V or more.)

2 Output: 5V +/-0.05V

3 double-panel design, the layout beautiful;

4 specially designed 2 pin pin hole can be directly fixed in the hole board for expansion experiments;

5 input and output using 2P single row of pins, easy to connect;

6 PCB board size: 2.5cm * 1.1cm

7 with power indicator (red)

8 1PCS weight is about: 7g
