

PAM8406 Digital Amplifier module With Volume Potentiometer 5Wx2 Stereo

- 1. Volume: 23 * 24MM weight:0.45 g**
- 2. Excellent noise suppression. in the absence of contact input audio, you will not hear any noise even put your ear close to the speaker**
- 3. The two-channel stereo, 5V power supply can output 5W + 5W power, directly drive 4, 8 speakers, output power, full of energy, good sound quality, with left and right channel volume adjustment.**
- 4. unique non-LC filter Class-D digital power board, it can be used directly for the USB-powered from computers.**
- 5. dual-panel wiring and proper solution to potential balance and channel crosstalk caused by the wiring between**
- 6. ultra-miniature design, it can easily be placed in a small space inside a variety of digital products, high amplification efficiency.**
- 7. Solder by machine**
- 8. The rated working voltage 2.5-5V, limit operating voltage 5.5V**
