

128X64 OLED LCD LED Display Module For Arduino 1.3" I2C IIC Serial

- Needn't backlight, the display unit can self-luminous
- High resolution: 128 * 64
- Viewing angle:> 160 °
- Supports many control chip: Fully compatible with Arduino, 51 Series, MSP430 Series, STM32 / 2, CSR IC, etc.
- Ultra-low power consumption: full screen lit 0.08W
- Voltage: 3V ~ 5V DC
- Working Temperature: -30 °C ~ 70 °C
- Module Size: 32.0MM*35.50MM*4.1MM
- I2C/IIC Interface, need 2 IO only.
- Driver IC: SH1106
