NOTES :

- 1. Pulse width</br>
- 2. Essentially independent of operating temperature typical characteristics.
- 3. The maximum current rating is package limited.
- 4. Repetitive rating, pulse width limited by junction temperature  $T_{J(MAX)}=150$  °C. Ratings are based on low frequency and duty cycles to keep initial  $T_J=25$  °C.
- 5. R<sub>OJA</sub> is the sum of the junction-to-case and case-to-ambient thermal resistance where the case thermal reference is defined as the solder mounting surface of the drain pins. Mounted on a 1 inch<sup>2</sup> with 2oz.square pad of copper.
- 6. Guaranteed by design, not subject to production testing.
