

**Product Name:NE555 Adjustable Frequency Pulse Generator
Module For Arduino**

Product Description:

- 1.100% Brand new and high quality!
- 2.On-board chip NE555.
- 3.A single channel output, the output duty cycle square wave is about fifty percent.
- 4.Onboard adjustable resistance, resistance can be controlled to adjust the output frequency.
- 7.Color: Blue.
- 8.Working voltage: 5-12V.
- 9.Size: 29 (mm) x12 (mm).
