

Product Name:H-bridge Stepper Motor Driver Controller Board Dual DC Motor Driver L9110S For Arduino

Product Description:

1. Low static work current.
2. Power supply voltage: DC2.5-12V.
3. Each channel has 800mA continuous current output.
4. Low saturation pressure drop.
5. TTL/CMOS output level compatible, can be connected directly to the CPU.
6. Output built-in clamping diode, apply to the perceptual load.
7. Control and drive integrate in IC.
8. Have pin high pressure protection function.
9. Working temperature: 0-80 °C.
- 10.Size:29.2(mm)x23(mm).

Package Included

| Packing List | Qty |
|---------------------------------------|-----|
| Controller Board Dual DC Motor Driver | 1 |
