Product Name:38KHz Infrared Sensor IR Sensor

transmitter   Infrared Motion Sensor For Arduino

Product Description:

1. For Arduino compatible sensor module kit for the beginners.

2. 100% New Brand and high Quality.

3. Fixed bolt holes for easy installation.

4. With a precision potentiometer adjustable sensitivity adjustment.

5. Material: Circuit board.

6. Transmit 38KHz modulating signal.

7. Size:18x14mm.

Package Included
