

Product Name: 3CH Digital Multi Servo Tester ECS RC Consistency CCMP Master Speed Controller

Product Features:

The device also can be used as a signal generator for electric speed controller (ESC), then you can test your motor system without using a transmitter and receiver.

There are 3 modes to check servos or ESC:

Manual mode: turn the knob with different speed, check the reaction time.

Neutral mode: make the servo go back to the neutral point.

Automatic "window wiper" mode: make the servo swing like a window wipers in the biggest angle.

It can connect 1-3 servos (servo must be under 55g) simultaneously and test such as 1-3 servos consistency and so on.

You can also connect 1-3 ESC to test and compare their reaction time respectively.

It can connect 3 servos of the CCPM helicopters and select servos.

It can also connect the servo of airplanes install the steering-box and adjust planes by using such as the neutral mode and so on.

Products Description:

Voltage consumption: DC4.8-6V

Color: Blue

Item size: 1.89 x 1.65 x 0.67in

Net weight: 0.25oz

Package weight: 2.56oz
