

# SW-520D BALL SWITCH/SWITCH TILT SWITCH

## Product Description

Vibration switch vibration / shaking Switch / ball switch angle switch tilt switch

Model SW-520D

Type Ball class

Maximum voltage 12V

Rated thermal current 0.1A

Operating temperature -40 to 75 °C

Insulation resistance 300Ω

Material number vibration switch

## Description:

Switch to use metal manufacturing, electrical characteristics similar but more secure than the mercury switch and very environmentally friendly, while shaking when conducting the same characteristics as the single, the assembly is more convenient and safe to use;

When you want to restore the electrical characteristics of the open state (OFF), switch to set the environment must be static, and (OFF) is set to be below the level of the open end angle;

This switch all materials are manufactured using environmentally friendly materials, meet ROHS requirements;

When the switch is OFF side angle of 15 degrees below the horizontal, when the shaking is difficult to trigger conduction;

The trigger switch for low current circuit, does not apply when the power switch;

The switch is a sealed package, dustproof, waterproof;

This switch is the best ball switch series conduction effect, the highest sensitivity
