

Product Name:2.4GHz RF Module NRF24L01+PA+LNA SMA
Antenna Wireless Transceiver Module

Product Description:

- 1.This wireless Transceiver module is an easy and suitable module if you want to setup your wireless communication system with low cost.
- 2.It can achieve a good balance between wireless transition performance and cost.
- 3.You can easily add it with your own MCU/ARM/PIC/AVR/STM32 system.
- 4.What's more, this nRF24L01+ module is designed with Power amplifier and SMA antenna.
- 5.This allowed you to use the wireless communication up to 1000 meters! (No barrier).
- 6.Frequency: 2.4GHz~2.5GHz.
- 7.Operating voltage: 3 ~ 3.6V.
- 8.Max Current: 115mA.
- 9.Multi-frequency: 125 frequency.
- 10.Support up to six channels of data reception.
