

# MOS FET Button IRF520 MOSFET Driver Module

## Product Description

- 1.Size: 33\*24mm.
- 2.Weight: 10g.
- 3.Voltage: 3.3V, 5V.
- 4.Ports: Digital Level.
- 5.Output load voltage :0-24V.
- 6.Output load current: <5A (1A above need to add heat sink).
- 7.Platform: Arduino, MCU, ARM.
- 8.Using original IRF520 Power MOS, you can adjust the output PWM.
- 9.It drives up to 24V allows the load, such as LED lights, DC motors, miniature pumps, solenoid valves.
- 10.PWM dimming LED can be used to achieve stepless dimming, variable speed motor.
