Screw Terminal Shield V2 V3 UNO R3 Media Exponsion Prototype Board

Product Description
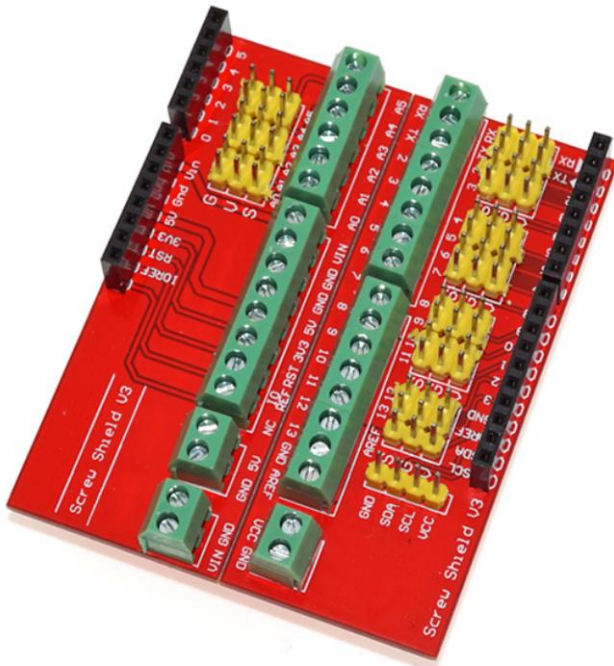

Expansion Board

Condition: New

Compatible with Arudino UNO R3、Arudino UNO、Duemilanove

Size: 29 x 71mm (single)

Combines the function of Arduino Screw Shield and Sensor Shield

Expand all of IO interfaces from Arduino

3-Pin male headers for easy sensor/servo connection

Description:

1.The Screw terminal can be screwed directly to the terminal on the thread and is reliable and convenient.

2.It can be plugged into the controller.

3.You can use this shield to save yourself from the bad port connection.

4.Feel secure with this compatible screw shield.

5.Both sides of the shield are broken out to the side of the board,

6.To allow access to everything on the main board.

7.Stacking headers are also included so you can pile more shields on top

8.This screw shield also extend the power supply pins for the signal pins.

9.You could directly plugin the sensors and the servos to the screw shield.
