

Product Name:DC 4-30V Digital LM35DZ LM35 Temperature
Sensor Linear Analog Output Sensor Module

Product Module

Product Description:

- 1.Size: 28mm (length) * 12mm (W) * 10mm (height).
- 2.Operating voltage: 4V - 30V.
- 3.Signal Output Type: Analog.
- 4.Temperature measuring range: 0 °C - 100 °C.
- 5.Measuring accuracy: ± 0.5 °C.
- 6.Linear scale factor: +10 mV / °C.
- 7.Low power consumption, less than 60uA.
- 8.Low output impedance, 1mA current through only 0.1 Ω .
- 9.With screw holes for easy installation and fixed. Aperture 2.6mm.
- 10."+": Positive power supply.
- 11."-": Negative one.
- 12."out": pick AD converter module analog signal input terminal or directly connected to the multimeter to measure.
