

Product Name:TTP223B Touch Module 1 Channel Capacitive Touch Button for Arduino

Description:

Control Interface: 3 pins (GND, VCC, OUT), GND is ground, VCC is the power supply, OUT for the digital signal output pin;

Touch light: red LED, touch that is shiny;

Touch area: Blank blue area, finger touch can be triggered.

Positioning holes: two positioning holes M2 screws, pore diameter 2mm, making installation easy positioning module

Features:

PCB size: 16mm * 30mm

100% brand new and high quality.

onboard TTP223 touch capacitive touch sensor IC

on-board-level status indicator

working voltage: 2.0V-5.5V

Package Contents:

1 x TTP223 Capacitive Touch Switch Module
