

Product Name: Smart Car LM393 Touch Sensor Button Detection
Switch Sensor Module For Arduino

Product Description:

1. Dimensions: Length 45mmX wide 18mmX high 5mm.
2. Main devices: op amp transistor.
3. Operating voltage: DC 3-5V.
4. Output TTL level signal indication.
5. Output IO ports can be connected directly to the microcontroller.
6. The relay module can be individually controlled.
7. Continuous work.

Package Included

Packing List	Qty
Smart Car LM393 Touch Sensor Button Detection Switch Sensor Module	1
