

GY-31 TCS230 TCS3200 Detector Module Color Recognition Sensor

Product Description

Using imported chip TCS3200
TCS3200 is TCS230 upgrade version, the better
Power supply 3-5V
Anti-light interference
White LED, can control light, off.
It can detect non-luminous object color
Best detection distance 1cm

Description:

Chip: TCS3200
Input voltage: DC 3 ~ 5V
Output frequency voltage: 0 ~ 5V
Use bright white LED lights
Can be connected directly with Microcontroller
Static detection of the measured object color
Best detection distance: 10mm
