

Product Name:HR202 Humidity Sensor Module Humidity Testing Module Humidity Detection

Product Description:

- 1.Can detect the humidity of the surrounding environment.
- 2.Adjustable sensitivity (shown in blue digital potentiometer adjustment).
- 3.Operating voltage 3.3V-5V.
- 4.Analog output form.
- 5.With fixed bolt hole for easy installation.
- 6.Small plates PCB size: 3cm*1.6cm.
- 7.Power LED (red) and the digital switch output indicator.
- 8.Using LM393 comparator chip, stable.
