ORION CR1620 3V Lithium Cell Lithium (Li/MnO₂)

-ORÎONº⊬

Lithium Coin Cells are small discs that are very small and very light, great for small, low-power devices. They're also fairly safe, have a long shelf life and fairly inexpensive per unit. However, they are not rechargeable and have high internal resistance so they can't provide a lot of continuous current. Do not purchase Lithium batteries before reading and understanding these safety cautions. Using a Lithium cell incorrectly may a cause it to leak, generate heat, smoke, catch on fire.

SAFETY

- +The cell must stay in the operating temperatures outlined in its data sheet.
- +The cell must not exceed voltage, current, and other ratings in its data sheet.
- Store batteries separately, and do not transport without proper packaging.
- +Never store or transport together with conductive or metallic objects particularly in a pocket or bag.
- +Do not keep in the sun, in a hot car, or anywhere with direct heat.
- +If the cell is attached to a PCB, keep it away from high-static environments.
- +Recycle discontinued batteries according to local regulations and cover terminals with insulating tape before disposal.
- Discharge end or cut-off voltage in data sheet is lower-limit for discharge cycle and should not be exceeded.
- +Charger or device should implement warning for over-voltage, over current, and over-temperature, control of overcharge, and charge timer.
- +Be careful not to short-circuit.

| TECHNICAL DATA | |
|--|-----------------------------|
| Cell Dimensions | 16x2mm |
| Cell Weight | 1.3g |
| Cell Capacity (68kΩ continuous to 2.0V) | 68mAh |
| Voltage (nominal) | 3V |
| Discharge Cut-off Voltage | 2V |
| Temperature range | -20°C to 80°C |
| Recommended Storage Temperature | 20°C ± 5°C |
| Open Circuit Voltage (fresh) | 3.10V ~ 3.30V |
| Open Circuit Voltage (after 12 months) | 3.10V ~ 3.30V |
| Closed Current Voltage (fresh) | ≥ 3.0V (load 15kΩ for 0.8s) |
| Closed Current Voltage (after 12 months) | ≥ 3.0V (load 15kΩ for 0.8s) |
| Service Life (47kΩ) | ≥630hours (cut off: 2.0V) |
| Service Life (47kΩ after 12 months) | ≥560hours (cut off: 2.0V) |
