# SEEED-114992282

Machine Learning Pack for Make a Robot Kit

PRODUCT DETAILS

Features
- Make A Self Driving Car
- Interactive & Engaging through AI Recognition
- On Device Model Training
- Designed to be extended in creative ways
- Customizable, Extendable & Open Source

Description

Machine Learning Pack is designed to be used with [MARK(Make A Robot Kit)](#) car. The pack helps users discover about Machine Learning, implementing the popular SUMO robot projects with the attachments and SUMO Competition Map. The items in this pack are also referenced in the Machine Learning Coursework which accompanies Make A Robot Kit.

The Machine Learning Pack includes a competition mat ideal for battle bot fights and enough battle hardware for two MARKs.

This kit is suitable for:

- Maker teachers
- High school students
- Homeschooling educators
- STEM camps
- AI experimenters
- AI & robotics learners

Part List

1 x Sumo Battle Map (1280*1280mm)

2 x Plates

4 x Brackets

10 x Nut (2 spares)

14 x Screws (2 spares)
