

## SEED-KIT05301M

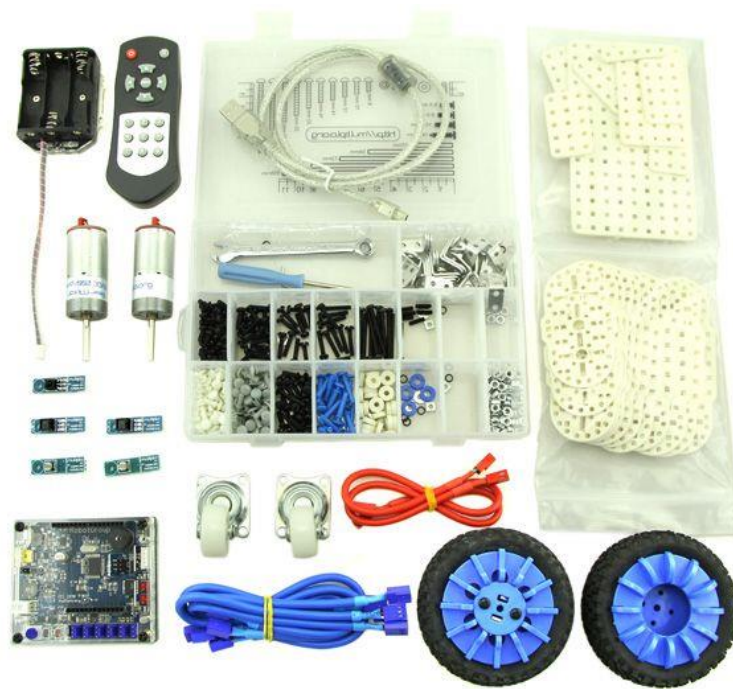

### Multiplo-Robot Starter Kit

## PRODUCT DETAILS

Multiplo is A system to design and build things in an easy way. It is a specially Robot, open source, widely successful funded Kickstarter project.

Robot Starter Kit. Excellent for beginners. You can start using it with the remote control but you can later program it with Arduino or our graphical tool Minibloq. It comes with the DuinoBot controller, 2 gearmotors, a remote control, 2 sensors and all the necessary mechanical parts, nuts and bolts and tools. Easy to assemble and easy to use. Still Multiplo compatible, so you can expand it or make creations of your own.
