

SEED-ARD119C0P

Seeeduino Catalyst Pack trimmed version

PRODUCT DETAILS

This is a deluxe pack for Arduino users; it includes basic components and prototyping platform, various Input and sensors, visual and audible output, flexible structure enhancement and extensive power options. It covers from starting up tutor to advanced experiments; with specially manufactured components and structures from this pack, you may even build customized shield NOW!

Pack included:

- 330 resistors X10
- 10K resistors X10
- 1K resistors X10
- 10nF ceramic capacitor X10
- 100nF ceramic capacitor X10
- 100uF electrolytic capacitor X5
- 40pin male breakaway headers X1
- Half size basic breadboard X1
- Breadboard jumper wire 70pcs pack X1
- Mini Push Button for breadboard X5
- DPDT switch for breadboard X3
- Thermistor X2
- Basic Green LED X5
- Basic Red LED X5
- Piezo Buzzer X1
- 6 pin stackable female header X1
- 8 pin stackable female header X3
- 8 pin female header X5
- 40pin male breakaway dual-headers X1
- Proto board 7*9 X2
- Heat shrink tubing X1
- Tilt Sensor X2
- Rotary Potentiometer X1
- 5mm RGB LED X3
- Mini DC motor X1
- Vibration Motor X1
- Transistor NPN X1
- Diode 1X
- Photoresistor X2
- Component box X1
