

# DBZ-20 SCREWDRIVER

-No need to strike with a hammer - just press the extractor bit firmly into the ruined hex screw head & twist it out!

-Target screws: Hex socket of cap bolt, countersunk or button head. Across flats: 2mm, 2.5~3.0mm, 4mm & 5mm

-The sharp fine-pitch spiral tip grips all 6 sides of a hex socket firmly without slippage

-Other screw head types such as Phillips, Torx, square socket can be extracted if an electric drill is used to drill a pilot hole in the screw head first

-Set Contents: DBZ-62, DBZ-63, DBZ-64, DBZ-65 bits | Bit size: 105mm × 6.3mm  
| Material: High carbon steel
