

PZ-55

The basic Screw Removal Pliers: Powerful and simple!

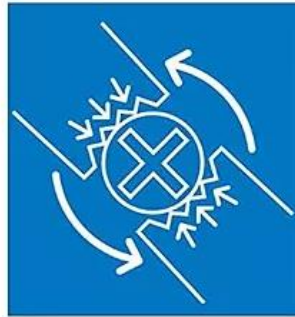

- Serrated jaws inside can bite a broken, damaged or rusted screw head and unfasten it with no slip.
- More powerful torque than screwdrivers
- Also ideal for driving a nut or bolt in case of no space to drive wrench in arc
- Lots of applications: DIY, maintenance, production machinery, drainage, etc.

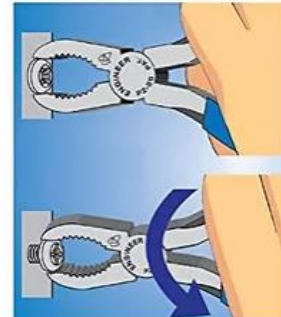

Features

Our original design of jaws creates powerful gripping and torque.

PZ-55 bites a screw head firmly and can remove it with no slip.

Just grip, turn - and you are done!

Applications

Stripped

Rusted

Torx

Dome Head

Screw Head Size

Round or Pan Head

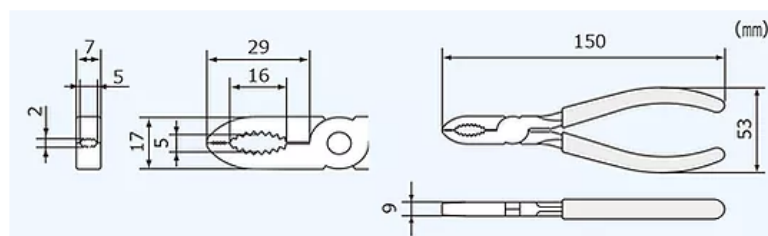

Screw head: dia. 3 to 8mm

Note

- 1) The tool may not remove specially-hardened, heat-treated or glued screws.
- 2) Be sure to apply this tool to a screw head, but not to screw thread.
