

# PZ-58

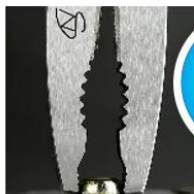

## Multi-purpose Extraction Tool for stubborn fasteners.

### Stripped or Rusted screws -- Just Grip & Turn with PZ-58 !!

- Unique jaws with both vertical and horizontal serrations grip a screw head securely without slipping
- Slim jaws designed for work in confined areas
- Much faster than fluted screw extractor and simpler than vise grip pliers
- With a side cutter for wire cut
- Spring loaded for fatigue-free work
- Internationally awarded design

## Features

**=Pan head screw=**  
PZ-58 has a firm grip on the screw head.

**=Low-profile dome=**  
The serrated jaws can fit around the screw head. Ultimate bite!

Cut copper wire (dia. 1.2mm)  
or steel wire (dia. 1.0mm)

Fatigue-free owing to spring action

## Heavy-duty T-shaped handles

This unique handle shape helps to prevent the handle sleeve from twisting or turning round, good for heavy users.

Light weight (20% less in-house comparison)

## Screw Head Size

Dome (Truss) Head  
Round or Pan Head  
Screw head: dia. 3 to 9.5mm

## Applications

Home improvement  
Do-It-Yourself

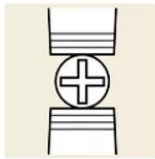

Automobile  
maintenance

Repair work

## How does PZ-58 work?

### Ordinary Pliers

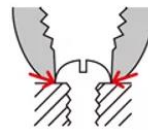

Ordinary pliers jaws are lined with horizontal serrations. When you grasp and turn a screw head with ordinary pliers, the jaws slip and the screw remains stuck.

The tips of jaws can not reach the outer edge of screw head when the jaws are opened.

### PZ-58

Specially-designed teeth generate gripping power.

The serrated jaws angled inward grab the rim of screw head, so no slippage.

## Note

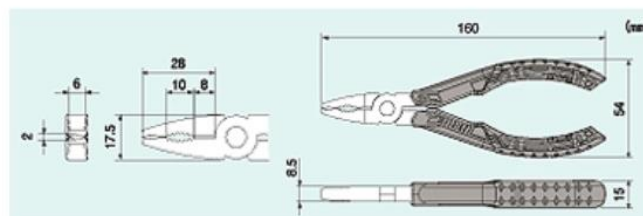

- 1) The tool may not remove specially-hardened, heat-treated or glued screws.
- 2) Be sure to apply this tool to a screw head, but not to screw thread.
