

PZ-60

With unique screw removal jaws, a must for electricians

- 21mm-long side cutting blades, ideal for cutting 3-core flat cable, too
- Crimper for bare terminals (AWG16~12)
- Eccentric high leverage structure, powerful cutting and gripping
- With unique screw extractor owing to vertical serrations inside jaws

Features

Side Jaws
remove nuts easily

High Leverage
30% more cutting power
compared to conventional pliers

Crimper for bare terminals
1.25 ~ 3.5 mm²

Strap Hole

2-way non-slip gripping jaws

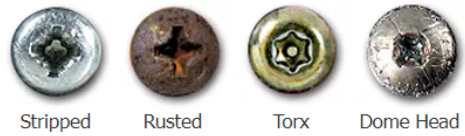

- Vertical serrations to grip a screw head securely
- Horizontal serrations to hold a tie band and a thin plate

Cutting Capacities

Cable / Wire Type	Cutting Capacity
Flat Cable	dia. 2.6mm x 3 cores
Steel Wire	dia. 3.2mm
Copper Wire	dia. 4mm
Stainless Wire	dia. 2mm
Stranded Wire	8mm ²

Removable Screws

Dome (Truss) Head
Round or Pan Head
Screw head: dia. 3 to 9.5mm

Heavy-duty T-shaped handles

This unique handle shape helps to prevent the handle sleeve from twisting or turning round, good for heavy users.

Light weight (20% less in-house comparison)

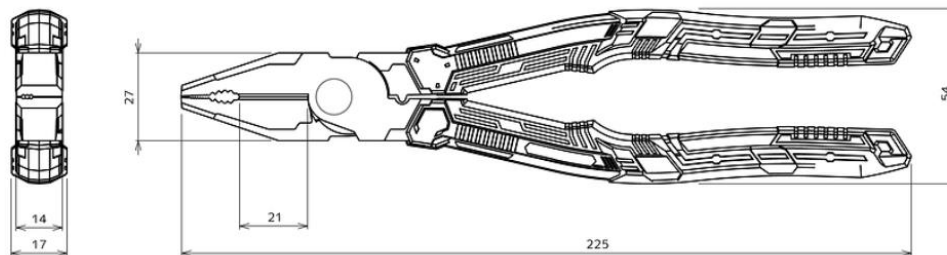

Note

1) The tool may not remove specially-hardened, heat-treated or glued screws.

2) Be sure to apply this tool to a screw head, but not to screw thread.

Specifications

Item no.	Size	Blade Length	Material	Jaws Hardness	Screw Head Size
