

ZC-50

Conveniently-designed earth cord to improve precise work in ESD environment

- Eliminate static electricity through wrist and prevent electronic components from being discharged statically.
- Curving-shaped & wide plastic body (30x20mm) featuring high conductivity around wrist
- Silver filaments in elastic band ideal for high conductivity & anti-metallic allergy
- 1M Ω resistance built in for safety

✓ No cord within reach
creates ideal working
space.

Cord sometimes
disturbs work on
the table etc.

Our unique design of earth cord is featuring long portion of the straight cord which enables users to place the cord through a sleeve of clothes and create ideal working space on the working bench.

A spiral cord hanging down from the wrist sometimes disturbs work and may drop something from the working bench.
