

Mini USB External Sound Card for NVIDIA Jetson Nano/

Raspberry Pi 400

INTRODUCTION

This compact, plug-and-play drive-free USB sound card allows you to enjoy the beauty of music with your NVIDIA Jetson Nano!

The sound card uses a high-performance audio USB DAC chip to achieve excellent sound quality. With USB input interface, it can be directly inserted into Jetson Nano, Raspberry Pi 400, computer, and other controllers or equipment to easily realize the external audio playback function. The output is a 3.5MM stereo interface, which can directly drive headphones, or be used as a power amplifier.

FEATURES

- High-performance audio USB DAC chip
- Plug-and-play
- Can directly drive headphones

APPLICATIONS

- NVIDIA Jetson Nano Audio Output
- Raspberry Pi 400 Audio Output

SPECIFICATION

- Power Supply Voltage: 5V DC
- Working Current: 135mA (5V)
- Working Frequency: 30-4000MHz (40dB)
- Amplifier Gain: 40dB
- Output Power (Max): +20dBm(100mW)@1dB
- Impedance: 50 ohms
- Compatible Systems: Windows, Linux

SHIPPING LIST

- Mini USB External Sound Card x1
