

PoE Injector - Single Port 30W

INTRODUCTION

This high power PoE injector supports Midspan MODE-B PoE power protocol, and has 30W output. It supports up to 10/100Mbps communicating speed, and 100VAC~240VAC wide range input voltage makes it work stably with different voltage standards.

With PoE output, you will no longer need any external power. This PoE injector meets your every project requirement such as router, wireless AP and other devices that use standard PoE protocol.

SPECIFICATION

Model: PSE801

Output power: 30W

Input power: 100~240VAC 50~60Hz

Dimension: 142mm*60mm*40mm (5.59"*2.36"*1.57")

Cable range: <=100m (3937")

Weight: 170g

SHIPPING LIST

PoE Injector - single port 30W x1

Power cable x1
