PERFWIPE ESD Trays Specification

Descriptions:
ESD Plastic Trays is manufactured from conductive plastic material PP ,
Specifically designed for component assembly and for compatibility with conveyors or cart transport systems.
These ESD Plastic Trays of ESD conveyor trays and ESD assembly trays are specifically designed for
electrical component assembly and compatibility with conveyors or cart transport systems, and possess
superior physical properties over thermoplastic and corrugated products.
ESD Plastic Trays of conveyor and assembly trays ensure complete protection from electrostatic discharge
for the life of the product.
They may be used consistently in temperatures ranging from -60° to 250° F (-51° to 121° C) and are resistant
to cutting oils, greases, solvents, mild acids and alkaline solutions within a pH rating of 3.0 - 10.0.
ESD Plastic Trays is easily cleaned in hot water or steam with standard detergents.

Featues:
Specifically designed for component assembly and for compatibility with conveyors or cart transport systems
Meets or exceeds ANSI/ESD standards for ESD protection
ESD Plastic Trays had Operating temps of -60° to 250° F (-51° to 121° C)
Surfeace resistance: $10^{6 \sim 10}$ ohm/cm
Inherent fiberglass strength and durability

Application:
ESD trays provide effective protection for handling PC boards and electronic components in assembly,
packaging,storage and processing areas.
Ideal for storage, transport and handling of electronic components

Order Informations:
