

PERFWIPE ESD Floor Marking Tape Specification

Descriptions:

The ESD floor marking tape is printed with the ESD logo .

This high visible, self-adhesive tape is suitable for marking the boundaries of ESD protected areas.

The ESD caution logo in black print, creating a prominent marker of EPA boundaries.

The tape is self-adhesive and adheres well to both synthetic and clean, particle-free concrete floors.

Features:

Tape adheres very well to synthetic floors such as PVC tiles.

Tape also adheres to concrete floors and can be expected to remain intact for several months depending on traffic.

The yellow tape printed in black with the ESD logo as per EN61340-5-1 and the text ESD Protected Area.

The tape is not antistatic as it is intended for use outside the EPA.

Applications:

The ESD floor marking tape are suitable for marking the boundaries of ESD protected areas.

Please note that the tape is not antistatic and is intended to mark the outer boundaries of an EPA. It should not be used within an EPA.
